OSA-0733-63
COPY 2 of 5

April 16, 1963

25X1A Dear [REDACTED]

1. Reference is made to your letter of 21 March 1963,
Subject: "Sanders Associates Technical Reports".

25X1A

2. Contract No. AF33(657)-8582 was assigned the subject contract prior to discovering that the same number had already been assigned to a contract with [REDACTED]. The number was intended as a back-up number for Contract NH-1420 with Sanders; however, through a misunderstanding as to its purpose Sanders had reflected the AF number throughout their cost and contract control records.

3. No action was taken with Sanders to correct the assigned AF number and substitute the Project number since it was felt that a change of contract number involving many unwitting Sanders employees would only tend to arouse speculation as to the contracting Agency. This course of action further was considered appropriate in this case since the Contract is of relatively short duration, due to expire on 30 June 1963.

4. Upon learning that Sanders had assigned the AF number openly to this Contract they were again instructed as to its purpose and were requested to use the number thereafter on a very restricted basis.

5. Please let me know if you desire any further action on my part regarding correction or use of Contract No. AF33(357)-8582 by Sanders Associates.

Regards,

SIGNED

21 March 1963

SUBJECT: Sanders Associates Technical Reports

25X1A TO: [REDACTED]

The SPO recently received single copies of two documents from the WSSC which were prepared by Sanders Associates, Inc. They are identified as follows:

"Special Function Generator Description - Prepared under Air Force Contract AF33(657)-8582" Report No. SAN-GBF-63-0594

25X1A

"Preliminary [REDACTED] Description - Prepared under Air Force Contract AF33(657)-8582" Report No. SAN-GBF-63-0123

For whatever action you may consider appropriate, we would like to point out that the Index Listing of Contract Numbers indicates that Contract AF33(657)-8582 was actually assigned to Contract SH-512 with [REDACTED]

25X1A

We would appreciate having another point cleared up. Request the SPO be advised whether Project policy permits contractors to [REDACTED]

25X1C

under Project contracts.

25X1A [REDACTED]
